(54) Transfer ribbon cassette, a case for enclosing the cassette and a paint film transfer device having the same.

(57) A transfer ribbon cassette (A) includes a feed core for winding a transfer ribbon (R) having a transfer film applied to one surface thereof, a takeup core (2) for taking up the transfer ribbon fed from the feed core (1), a case (C) for containing the feed core and takeup core (2), and a holder for supporting the feed core (1) and takeup core (2) in a relative positional relationship for mounting in the case (C). Each core is rotatably supported at one end thereof and, when mounted in the case, has a free axial end thereof supported by the case. This cassette (A) may be used as a paint film transfer device.

CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone		T : theory or principle underlying the invention	
Y : particularly relevant if combined with another document of the same category		E : earlier patent document, but published on, or after the filing date	
A : technological background		D : document cited in the application	
O : non-written disclosure		L : document cited for other reasons	
P : intermediate document		A : member of the same patent family, corresponding document
